

Summer Term

Welcome Back!

Year 6 – Summer term 2022

Welcome back after the Easter break.

We hope you had a fantastic time and are looking forward to the rest of the year ahead and your final term at Goldthorn Park before you move onto your new schools. It's going to be an action-packed term full of important and exciting things. 😊

Maths

As mathematicians in year 6, children will be continuing to improve their learning by developing their reasoning and arithmetic skills. They will become more confident in understanding and solving both arithmetic problems and worded problems.

Children will enhance their understanding of fractions, decimals and percentages while continuing to secure their addition, subtraction, multiplication and division knowledge ready for the SATs tests.

English

In English children will continue to explore a range of genres including story writing, newspaper reports, non-chronological reports and persuasive writing. Children will be developing a range of key writing skills, which will include using a range of word choices, sentence variations and higher level of punctuation in preparation for their end of year writing assessment. We will also be developing key reading skills in our guided reading and our whole class reading sessions.

Science

In Science, children will move on to learning all about classification. As enthusiastic scientists, the children will also be furthering their working scientifically skills.

MFL

Modern Foreign Languages will focus on French. Children will be given informal opportunities to experience and use the language

Physical Education

PE will be taught by Soccer 2000.

Thematic

Our thematic units are cross-curricular, covering all the traditional subjects as well as more contemporary areas of study such as sustainability and well-being.

Our first theme this term will be, 'Global Warning'.

"Global Warning" is a thematic unit, which is geographical-focused with sustainability and eco

literacy at its heart. This project-based theme involves children applying their learning about the global environmental issues of waste and pollution by creating a board game, which is both educational and fun. Children will work in groups to research, design and produce a board game, after which they will present and demonstrate it to the class.

Religious Education

In religious education, children will be looking what we can learn from religions in our community and how children can support each other to understand how important beliefs and values are to individuals.

PSHEd

This term children will be busy learning all about Media literacy and Digital resilience.

Children will evaluate media sources and sharing things online.

Please feel free to contact the year 6 team if you have any questions.

Kind regards
Mr Rawlinson and Mr Pryce
